#### REMARKS

Reconsideration is respectfully requested.

Applicant appreciates the courteous interview granted by Examiner Grumbling with William J. Schramm on November 13, 1996. During the course of that interview, the primary reference Omar was discuss. The arguments that were made during the course of that conversation are the same arguments that are presented herein. It was indicated that the Omar reference is primarily concerned with thiourea materials and that the compositions are primarily concerned with gram positive anti-bacterial compositions. It was suggested that such materials be deleted from the claims and that M only be oxygen.

The claims have been revised to delete those portions of them. The -SO<sub>2</sub>-derivatives have been maintained in the claims for A. Because of the use of brackets in a number of the claims, Applicant has presented many of the old claims as new claims some of which are independent claims. For ease of reviewing the Amendment, Applicant has indicated below which claims have been rewritten as new claims.

Claim 46 has been rewritten as claim 68.

Claim 47 has been rewritten as claim 69.

In view of the above comments, it would appear the case is in condition for allowance and a notification of allowance is respectfully requested. Should the Examiner have any question with respect to the Amendment, he can contact the undersigned by calling collect.

Respectfully submitted,
